

Meeting technology to help you get stuff done

Back-to-back meetings make your workday a drag. Unfortunately, the very technology running those meetings often makes things worse.

Different meeting apps for different devices

Unreliable audio and video connections

And that big presentation? Nobody can see it.

Meetings are complicated enough. Your collaboration technology should make them easier.

1

Easier to set up and get started.
Easier to hear and see.
Easier to share work and collaborate.

2

Anyone can participate from any location.
On any device.
At any time.

It doesn't seem like too much to ask, but for many, this collaboration technology is still a dream. And while the solution can't whisk you away to a tropical locale, it should at least let you work from one.

What does dream meeting technology look like?

Easy to use

Reliable

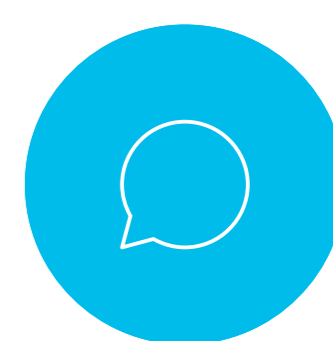

High-quality audio

Real-time screen sharing

Video conferencing

Integrated messaging

Cisco has already made the dream a reality.

And the technology is available now. The Cisco collaboration solutions portfolio delivers exactly what you need for easier, more secure, more reliable meetings.

Cisco Webex Teams Everyone in one virtual room

More than an app, it's a single, secure platform to message, meet, share files, and whiteboard ideas.

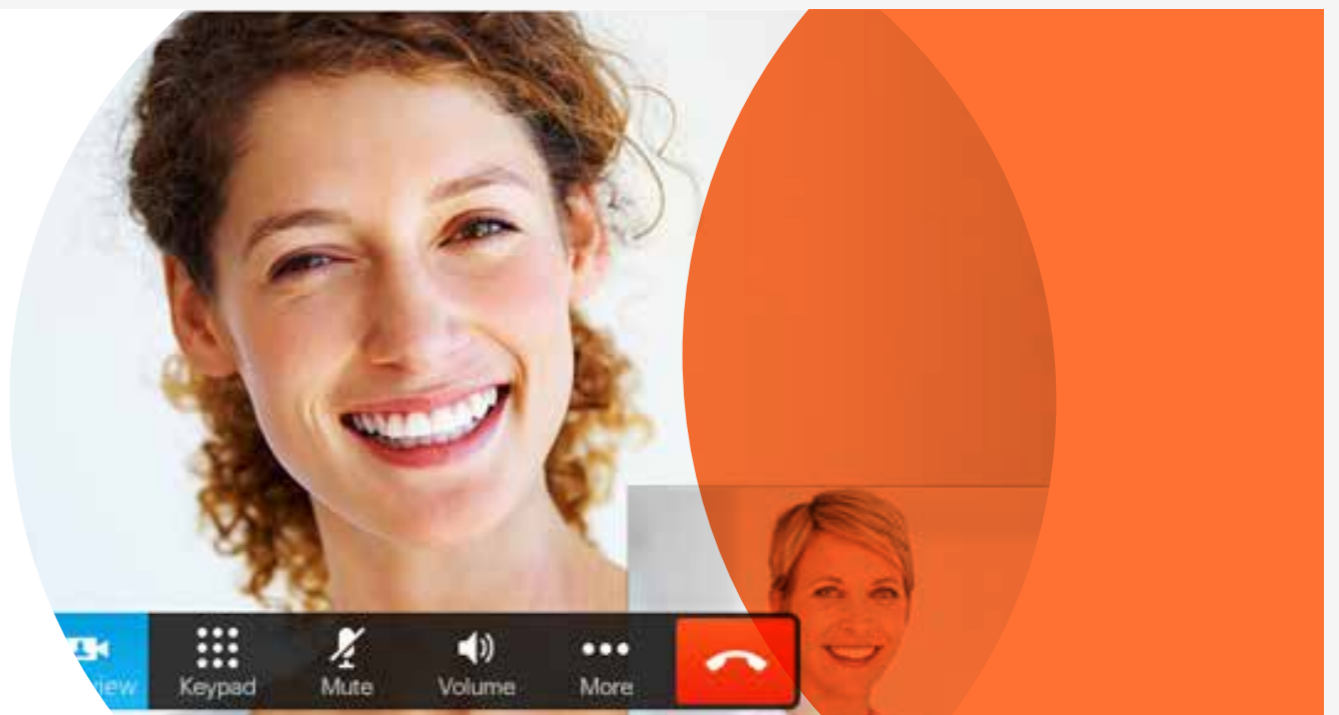

Cisco Webex Meetings Advanced video conferencing made easy

This is a video-first, connected meeting experience that lets people host or join from anywhere.

Cisco Jabber Collaborations with zero limitations

Get IM, voice and video calls, desktop sharing, conferencing, and presence information.

Your packed meeting schedule just got a little easier to manage.

Connect your workers in new ways that make the day run a bit smoother. Rely on the trusted industry leader in meeting and collaboration solutions.
